   3.7 Telephone Services
   3.10 Research Travel Support
   3.11 Dissertation Financial Support
   3.13 Research Institutes

4. PROGRAM REQUIREMENTS ........................................................................
   4.1 Hours for Degree
   4.2 Course Descriptions
   4.3 MA Degree Requirements
   4.4 Ph.D. Degree Requirements
   4.5 Statistics and Research Methods Requirements
   4.6 PhD Comprehensive Examinations
   4.7 Ph.D. Dissertation and Prospectus
   4.8 Graduate Colloquium

5. GRADUATE ASSISTANT RESPONSIBILITIES ............................................
   5.1 GA Work Assignment and Hours
   5.2 Teaching Assistantships
   5.3 Independent Teaching Responsibilities
   5.4 Teaching Practicum
   5.5 Teaching Evaluations
   5.6 Graduate Research Assistants
   5.7 Annual Evaluation of Graduate Assistants
   5.8 Sexual Harassment Policy

6. UNIVERSITY GRADUATION REQUIREMENTS .......................................
   6.1 Requirement to Enroll in Final Semester
   6.2 Dissertation Defense and Submission of Approved Copy
   6.3 Summary of Doctoral Requirements (University)
   6.4 Summary of Masters Requirements (University)
1. **ADMISSION AND ENROLLMENT**

1.1 **Application Procedures and Deadlines**

The Department of Political Science considers applications for admission at any time; however, prospective graduate students are encouraged to initiate their applications as early as possible. If possible, applications should be complete by January 15 since several financial awards and fellowships have deadlines as early as February 1.

Applications for admission may be obtained from the Office of Admissions and Records, West Virginia University, PO Box 6009, Morgantown, WV 26506-6009 or the Department of Political Science, West Virginia University, PO Box 6317, Morgantown, WV 26506-6317 or on-line at http://www.polsci.wvu.edu. International students should request the application form designated for international students. The completed University application should be sent to the Office of Admissions and Records. The Department application should be sent directly to the Department of Political Science. All applicants must also arrange to have official transcripts of all previous course work sent to the Office of Admissions and Records.

1.2 **Grade Point Average**

In order to be admitted as a Regular graduate student in the M.A. program, applicants ought to have achieved at least a 3.0 cumulative grade point average at the undergraduate level. Ph.D. applicants are expected to have attained a 3.5 undergraduate GPA and/or a 3.5 graduate GPA.

1.3 **Course and Major Pre-requisites**

Students admitted to either the M.A. or Ph.D. program ideally should have had a substantial background in political science, some preparation in statistics, and to have demonstrated skill in written composition. In the case of statistics, students should have completed the equivalent of one undergraduate course in statistics as taught in a mathematics or statistics department. The minimal requirements in political science is six credit hours; however, students may be admitted with any undergraduate major or graduate concentration, although political science and public administration are the preferred fields. Students deficient in any of these areas may be required to take remedial course work (see Section 4.5).

1.4 **Graduate Record Examination (GRE)**
Before students are admitted as Regular graduate students they must submit the results of the General Aptitude Sections (Verbal, Quantitative, and Writing) of the Graduate Record Examination (GRE). On rare occasion, the Admissions Committee will consider a Law School Admission Test (LSAT) score in the admission process, but the requirement that all students take the GRE as a condition of admission is an absolute requirement of the department. The graduate program does not require the specialized or advanced test in Political Science.

Although the GRE may be taken at any time, it is highly desirable that prospective students take the examination a year before the planned time of enrollment. For Fall Semester enrollment, it is common to take the GRE the previous October or December. Information on the GRE may be obtained at http://www.ets.org/.

1.5 **Test of English as Foreign Language (TOEFL)**

Applicants from non-English speaking countries must submit the official results of the Test of English as a Foreign Language (TOEFL) in addition to the GRE. **This is a University requirement and cannot be waived by the Department.** TOEFL results must be sent directly to the Office of Admissions and Records from the Educational Testing Service (ETS).

Non-U.S. applicants are required to provide the University with original or certified copies of the applicant's official academic record in the original language of issue, an original or certified copy of official certification of degree in the original language of issue, and official English translations of the applicant's academic record and certification of degree. All of these items, in addition to the application, should be sent to the Office of Admissions and Records, West Virginia University, PO Box 6009, Morgantown, WV 26506-6009.

1.6 **Letters of Recommendation**

Students applying for admission program must submit three letters of recommendation. Letters should be from college or university instructors who are familiar with the applicant's academic work. Letters from employers may be submitted, but at least two are required from instructors. Applicants returning to graduate study after an extended absence from college and who have difficulty obtaining academic letters of recommendation, should speak directly with the graduate director. **Letters of recommendation should be sent directly to:** Director of Graduate Studies, Department of Political Science, West Virginia University, 316 Woodburn Hall  PO Box 6317, Morgantown, WV 26506-6317.

1.7 **Department Application and Personal Statement**

In addition to the University application, applicants for admission must complete and return a separate **Departmental Application and Application for Assistantship.** This application requires a 200-500 word personal statement. This statement should indicate the intellectual and career goals of the applicant and how this program will aid the applicant's educational plans. **The department application should be returned directly to the Director of Graduate Studies, Department of Political Science, West Virginia University, PO Box 6317, Morgantown, WV 26506-6317.**

1.8 **Admissions Committee**

All admission decisions are made by the Graduate Admissions Committee consisting of five members of the graduate faculty appointed by the Chair. Although the admission decision takes into account a number of factors, most successful applicants have at least a 3.0 undergraduate GPA and GRE scores that place them in the 80th percentile. Applicants who do not meet these criteria are still considered
for possible admission.

In addition to admissions, the Admissions Committee is responsible for developing and overseeing the entire admissions process from initial recruitment and contact of potential students to final acceptance. The committee also regularly reports data regarding admissions to the full graduate faculty.

The Director of Graduate Studies serves as the principal contact point for admission inquiries and program information.

1.9 Tuition, Fees, and Other Costs
Unless waived by the University, students are responsible for all tuition, fees, and other costs. These costs vary from year to year and are subject to change without notice. The current tuition and fees for residents is approximately $6180 for the 2011-2012 academic; for non-residents $17,700. Students who receive financial assistance (eg, a GTA position) or a tuition waiver must still pay mandatory fees of approximately $600 each semester.

1.10 Housing
The University Housing and Residence Life Office http://housing.wvu.edu/ provides information concerning University-owned housing. The Student Life Office in Elizabeth Moore Hall, (304) 293-5611, (http://www.wvu.edu/~studlife/), provides information concerning privately owned, off-campus housing. Listings for privately owned rentals change daily so students should check often to see what is available. Since private housing varies in quantity and quality, depending on location, it is advisable for students to arrange for housing in person to assure complete satisfaction with living arrangements.

1.11 Orientation Program
After acceptance into the program, students will receive notification of the Graduate Student Orientation sponsored by the Department of Political Science. This orientation will be held just prior to or at the beginning of the Fall semester. Attendance at this orientation is required. In general, students should plan to arrive on campus sometime during the period August 15-20 of the year in which enrolled. There is no formal orientation program for the Spring semester, although students entering in January will meet informally with the Director of Graduate Studies.

1.12 Course Registration
Students admitted to the program will receive notice of their admission both from the department and the Office of Admissions and Records. Along with this notice will be a Letter of Intent to enroll in the program. The letter of intent should be returned to the Department of Political Science as soon as possible. Course registration will follow thereafter, either at your convenience during the pre-registration period or at the time of general registration at the beginning of the semester. Course registration should be arranged with the department's Director of Graduate Studies.

1.13 Advising
The Director of Graduate Studies serves as the advisor for all incoming graduate students. After the first year in residence, each PhD student will be assigned a permanent faculty advisor for the remainder of his or her program. The permanent advisor along with the student, will make sure all requirements of the program are completed. Advisors will maintain the Plan of Study (Advisor's
Checklist) in the student's file. In consultation with the Advisor each student must submit a Plan of Study to the office of the Dean during the first semester of residence. This plan serves as a guide for graduate work, and while not a binding contract, represents the anticipated course of study. It may be modified at any time, subject to the approval of the Director of Graduate Studies, the Department Chair, and the Dean of the Eberly College of Arts and Sciences.

Ph.D. committees may also be changed between the comprehensive examination and the dissertation. While continuity of advisor and committee structure is advised, the selection of an advisor and committee is based on the academic interests of the student, and the department recognizes that these interests may change over the course of a student's program of study.

2. **GOOD STANDING AND ANNUAL EVALUATION**

2.1 Minimum GPA Requirement for Continuation

In order to remain in good standing in either the M.A. or Ph.D. program, students must maintain a 2.75 cumulative grade point average for all graduate coursework and attain a 3.0 in political science in each semester for which they are enrolled. Students who do not maintain a 3.0 cumulative average in political science will be placed on probation and/or suspended if they fail to regain a 3.0 cumulative average in political science in their next nine hours of study. Under no circumstances will a student be permitted to continue in the program if he or she falls below the minimum university requirement of 2.75 for two consecutive semesters. Courses taken as a pre-requisite are not counted toward meeting these criteria.

2.2 Annual Department Evaluation of Student Progress

At least once each academic year, all students will be reviewed by the graduate faculty to determine their standing in the program and to evaluate their progress toward obtaining the degree. The purpose of this evaluation is to help students assess their progress to date and to target particular goals and needs in the forthcoming semester or year. The faculty will evaluate students on the basis of their academic performance (cumulative GPA and performance in individual courses), level of commitment to the program (participation in seminars, colloquia, and other departmentally sponsored activities), task completion (including performance as a graduate assistant, if applicable), and timely progress toward completion of the degree.

2.3 Course Incompletes

Occasionally, students may, in agreement with the instructor, receive an Incomplete ("I") in a course. Incompletes are given only in unusual circumstances, principally because of unavoidable personal circumstances or for research topics requiring special development. It is college policy to require the removal of any incomplete received in a regularly scheduled course by the end of the next semester. Failure of the student to complete the requirements for the incomplete will result in the "I" changing to an "F."

2.4 Residency Requirement

Although graduate study may be pursued on a part-time basis, the nature of the graduate experience is such that it is highly desirable to devote full time to the program's course of study. Full time, on-campus study allows for the full utilization of library, computer, and other resources, professional interaction with faculty and other graduate students, and timely completion of the degree. Students in the M.A. and Ph.D. programs are required to spend a minimum of one academic year in residency, taking a full load of courses, participating in colloquia, and generally contributing to the intellectual
and professional life of the department.

2.5  Course Load
Full time students are expected to take a minimum of nine hours each semester in residence. In most instances, students will enroll in three regular courses (core or elective) plus the Colloquium, for a total of 12 hours. If a graduate student is using the University libraries, research facilities, or consulting with graduate committee members, it is necessary for the student to enroll for at least one hour of graduate credit (P.S. 797) during that semester.

2.6  Auditing
To improve knowledge of the policy process and the discipline of political science, graduate students are encouraged to audit upper-level undergraduate courses (300 level). The auditing experience provides organized substantive knowledge of a subfield of the discipline or a related discipline. Students with fewer than twenty undergraduate hours in political science and doctoral students considering teaching should consider auditing political science or other courses relevant to their career aspirations. An auditor attends class sessions and reads class materials but does not submit to examinations or papers. Auditing a course appears on the student transcript so that prospective employers can assess the student's learning experience. Auditors enrolled for less than 9 hours must pay tuition, although tuition waivers do apply to audited hours.

2.7  Academic Integrity and Professional Ethics
West Virginia University, the Eberly College of Arts and Sciences, and the Department of Political Science are fully committed to academic integrity and ethical behavior as it relates to the academic enterprise and the political science profession. This means that the department will adhere strictly to the rules regarding academic honesty at the University (Graduate Catalog, pp. 42), and the standards of the American Political Science Association in regard to professional ethics (APSA, A Guide to Professional Ethics in Political Science). Collectively, these rules and guidelines cover such items as cheating, plagiarism, sexual harassment, research integrity, student-faculty relations, co-authored works, and other matters related to cheating and professional ethics. Violation of these ethical standards will result in expulsion, in accordance with the rules of the University. The Department of Political Science takes academic integrity seriously, students who engage in plagiarism in any course or on any comprehensive examination will be removed from the program.

3.  RESOURCES FOR GRADUATE STUDY

3.1  The Graduate Faculty
The Department of Political Science has a nationally recruited graduate faculty. These faculty are organized on the basis of their functional contribution to the graduate program. Members of the graduate faculty, their specialties, and the courses they teach, are listed on the Table of Faculty Specializations on page 7.

3.2  Graduate Assistantships/Fellowships
The Department of Political Science offers financial assistance to students on a competitive basis. Graduate assistantships and fellowships range from approximately $11,200 to $15,000 a year plus remission of tuition. There are also additional assistantships and fellowship opportunities offered in the greater University. These include the DuBois Fellowship, for minority applicants, and the Swiger
Fellowship, open to all new PhD students. The McGance Fellowship, offered through the Department of Political Science and the Department of Public Administration, is reserved for MA applicants from West Virginia who are committed to public service in West Virginia. Other sources of financial aid include graduate assistantships in the Office of Housing and Residence Life, the Office of Social Justice, The Center for Black Culture, University Advising Center, University Extension Service, and Office of Institutional Analysis. College Work-Study and various loan programs are also available.

Every applicant to the graduate program is considered for financial assistance, provided he or she has completed the Departmental Application for Admission and Assistantship accompanying the application materials. Returning students are considered for funding provided they apply for renewal. Applicants for non-departmentally awarded scholarships (DuBois Fellowship, Swiger Fellowship, McGance Fellowship) should be prepared to submit separate applications for these fellowships by January 15. All other applications for financial assistance should be submitted by March 1. Graduate assistantships and fellowships will be announced around April 1. Information on fellowship opportunities is available at http://grad.wvu.edu. Information on employment opportunities can be found at at http://www.studentjobs.wvu.edu/. We have had a good deal of success with graduate students being funded by Undergraduate Advising, http://www.wvu.edu/~advising. In addition the Office of Social Justice, http://www.wvu.edu/~socjust/, the Center for Black Culture and Study, http://cbc.wvu.edu/, and the Center for Women's Studies, http://wmst.wvu.edu/ provide funding opportunities for graduate students.

All graduate assistants and fellows are required to be full-time students (enrolled in nine hours or more). Students may hold only one appointment as a graduate assistant per term. Although holders of assistantships and fellowships are exempt from paying tuition, all students must pay the Mountainlair Student Union, U92 radio station and Daily Athenaeum newspaper fees, health fee, transportation fee, athletic fee, and recreation fee.
## Faculty Specializations

### American Public Policy and Politics

### 3.6 Office/Desk Assignment

Graduate teaching assistants will be assigned office space that will permit individual conferences with students enrolled in their classes. Graduate research assistants will be assigned offices or desks appropriate to their specific research activity. Although office and desk space is limited, the department will make every effort to accommodate all graduate students with office or desk space that is conducive to strong academic performance and professional development. Office and desk assignments are made at the beginning of each semester and no assignment is guaranteed for more than a single semester.
3.7 Telephone Services
The department provides telephone service for all graduate assistants for local calls only. Any long-distance use must be cleared by the Office Manager. In special instances, students may use long-distance service for research, but this must be approved by the Director of Graduate Studies or the student's research supervisor who will arrange such services through the Office Manager.

3.8 Mailboxes
All graduate students are assigned a mailbox on the third floor of Woodburn Hall next to the Seminar Room (Room 306E). Students should check their boxes daily for notices, messages, and personal mail. Students are expected to assume all costs of personal correspondence. Use of the department's mailing services is confined to official correspondence and is only rarely authorized by the department. Students engaging in mail survey research may request support from the department. Such requests should be made through the student's research supervisor to the Office Manager.

3.9 Graduate Student Association
All M.A. and Ph.D. students are encouraged to join the Graduate Student Association in the department. This association promotes the interests of graduate students and selects a member to serve on the Graduate Committee.

3.10 Research Travel Support
The University provides limited travel support for Ph.D. students conducting research. Applications for this support (Doctoral Student Travel Program Application) may be obtained from the department and may be submitted at anytime. The maximum award is $400. This support may be used for data collection, travel to present a paper at a professional conference, or other appropriate research activity. Applications are to be prepared in draft form first and then presented to the Chair of the department prior to submission to the University granting authority. All final applications will be prepared neatly and carry the department's endorsement and matching financial commitment. This fund is limited, and PhD candidates desiring this support should submit their requests early in the fiscal year.

3.11 Dissertation Financial Support
The University provides financial support for dissertation research, including data collection, data analysis, printing, or other expenses. The maximum amount of any award is $800. The application (Doctoral Student Research Program Application for Support) is available from the Department of Political Science. Applications should be prepared in draft form and submitted to the Chair of the Department. A neatly prepared final application carrying the department's endorsement will then be submitted to the University granting authority.

3.12 The Library
The West Virginia University Library contains over a million volumes and 900,000 microforms. Some 30,000 volumes are added each year, and 9,000 periodical titles are received. Major collections of particular relevance to political scientists are housed in Wise Library (General), Colson Hall (West Virginia Collection, Reserve Library), Evansdale (Education, Agriculture, Forestry, Engineering), Medical Center (Health), and Law Library.

Graduate students have full access to university libraries and are issued an encoded Library Card. As in every library, restrictions are imposed on the amount of time an item may be checked out and heavy fines imposed for violations. Failure to pay library fines will prevent students from
registering for classes and from graduating.

### 3.13 Research Institutes
Students in the public policy program have the opportunity to become associated as a graduate assistant with various research units at the University. These institutes operate separately from the department and select their own personnel, including graduate assistants. Research institutes which hire graduate assistants include:

- **Institute for Public Affairs**
  West Virginia University
  301B Woodburn Hall; PO Box 6317
  Morgantown, WV 26506-6317
  Telephone: (304) 293-5432

- **Regional Research Institute**
  West Virginia University
  511 North High Street; PO Box 6825
  Morgantown, WV 26506-6825
  Telephone: (304) 293-2896

- **Survey Research Center**
  West Virginia University
  212 Armstrong Hall; PO Box 6370
  Morgantown, WV 26506-6370
  Telephone: (304) 293-7570

- **National Research Center for Coal and Energy**
  West Virginia University
  PO Box 6064
  Morgantown, WV 26506-6064
  Telephone: (304) 293-2867

- **Research and Training Center**
  West Virginia University
  PO Box 6122
  Morgantown, WV 26506-6122
  Telephone: (304) 293-5313

### 3.14 Conference Papers and Participation
Although students entering the public policy program are targeting a variety of careers, both academic and applied, a common requirement of all fields is the ability to conduct primary research. This ability involves a capacity to design a research project (including defining a research question), collecting data, data analysis, and writing, reporting, and presentation. In order to perfect these skills, graduate students are expected to prepare papers for presentation at local, state, and national conferences. The faculty will guide students in this important aspect of their professional development, often collaborating with students, and providing advice on the proper course to follow.
in presenting research. Students should seek opportunities to present their research, either singly or as co-authors with other students, or in collaboration with faculty. The most common research presentation experiences available to students at West Virginia University include department-sponsored colloquia, the annual meeting of the West Virginia Political Science Association, and the annual meetings of the Southern, Midwest, and American Political Science Associations, as well as various other regional conferences and specialized meetings such as the annual meeting of the International Studies Association. This process should begin early in one's graduate career.

Ideally such conference paper presentation should be seen as a prelude to publication. Students are strongly encouraged to make publication the final goal of these extensive research activities. Publication in professional journals is generally perceived as the single most influential factor in enhancing placement of students in professional and academic positions.

3.15 Membership in Professional Associations
Graduate students are strongly encouraged to become student members of professional associations, including the American Political Science Association and the West Virginia Political Science Association. Memberships are also desirable in selected regional associations such as the Midwest Political Science Association, the Southern Political Science Association, and the Western Political Science Association. Such memberships are indications of a strong commitment to the profession of political science and to the research and teaching activities associated with these professional groups. Application for memberships are posted on the bulletin board outside 316 Woodburn Hall or available from the staff.

3.16 Survey Research/Human Subjects
Some graduate students may receive training in survey research or other primary data collection techniques through one or more research methods or substantive courses taken in the Department of Political Science or other departments. Training may include project design, questionnaire construction, survey sampling, telephone and personal interviewing techniques, survey coding, experimental design, and data analysis.

Students planning surveys or other primary data collection should work closely with their research project director in order to assure full compliance with all University regulations involving research on human subjects and the highest standard of professional ethics in conducting survey research. Surveys may be conducted only after University approval has been received. The student's project director should be consulted in regard to research conducted on human subjects to assure full compliance with University regulations.

Financing of research surveys is the primary responsibility of the student, although the department may, upon request, facilitate various aspects of the survey. The services of the University Survey Research Center, located in Armstrong Hall, are also available to the student on a fee basis.

4. PROGRAM REQUIREMENTS

4.1 Hours for Degree
In order to receive the M.A. degree students must complete a minimum of 36 credit hours, exclusive of hours earned in the Graduate Colloquium. Students with course deficiencies or those lacking a background in statistics or economics may have to take courses that cause them to exceed 36 hours. Under normal circumstances, Regular graduate students should be able to complete the M.A. in four semesters, provided they enter the program in the fall semester and have sufficient background in
Students in the Ph.D. program normally complete a minimum of 72 credit hours, exclusive of the Graduate Colloquium. The 72 credit hours may include hours earned previously in a masters degree, provided the MA degree hours are relevant to the student's program. This total consists of 48 hours of instruction and the dissertation, which carries with it 24 hours of (pols 797) graduate credit.

Although 72 credit hours is the minimum for Ph.D. students, it is more important that the student take sufficient hours to become fully competent in the student's chosen fields of study. This may require more than 72 hours and the Ph.D. student should be prepared for a long-term commitment to course work as well as independent reading and research. In most instances, doctoral students will take four years to complete all work for the Ph.D., including work completed for the masters degree.

Students completing an MA in Political Science or an MPA in Public Administration can expect their MA course work to transfer to the non-testing fields of the PhD, subject to graduate committee approval.

4.2 Courses
The Department of Political Science offers MA and a PhD degrees. Fields of study include Public Policy, American Politics, International Relations, Comparative Politics, and Research Methods and Theory.

4.2.1 Public Policy
These courses are designed to guarantee a common body of knowledge with respect to the field of policy studies and a demonstrated ability to conduct policy analysis. The policy field consists of:

P.S. 530 Public Policy Analysis
This course provides an introduction to the field of public policy studies, with attention directed at the theoretical underpinnings of same. The seminar focuses on the policy process, with a review of the institutions, processes and actors involved in the drama that is public policy.

P.S. 555 Comparative Public Policy
This course examines public policy processes and outputs from a cross-national perspective, with particular emphasis on developed countries.

P.S. 630 Seminar in American Politics and Policy
This seminar surveys the literature on various institutions and linkage mechanisms in U.S. politics and how they affect the public policy process.

P.S. 635 Seminar in Public Policy Evaluation
This course examines the methods and techniques used in evaluating public policies. Topics include types of evaluation; alternative evaluation designs; measuring program consequences; problems of utilization; and the setting of evaluation research.

P.S. 638 Seminar in Public Policy Implementation
This course examines how attitudes and behaviors of public officials and the organizational environment in which they function influences policy execution.
4.2.2 American Politics
These courses are designed to guarantee a common body of knowledge with respect to the field of American politics, with a focus on institutions and political behavior. The field consists of:

P.S. 630 Seminar in American Politics and Policy
This seminar surveys the literature on various institutions and linkage mechanisms in U.S. politics.

P.S. 710 Judicial Politics, Policy and Law
This course examines judicial influences on American public policy with emphasis on the political theory of American law, the agenda of disputes, the formulation of public policy by courts, and the effects of judicial policy on politics.

P.S. 712 American Constitutional and Political Development
This seminar addresses the historical development of the ideas and institutions of American governance and evolution of the politics of American constitutionalism.

P.S. 715 The Presidency
This seminar examines the forces which have given rise to the modern presidency; the elements of presidential power and influence; the nature of the president's relations with other key power centers in our political system (Congress, public, bureaucracy, parties, media, courts); presidential decision-making in foreign and domestic policy areas.

P.S. 7-- Congress
This seminar introduces students to the research literature on the U.S. Congress, with a focus on members' decisions, the creation and reform of congressional institutions and rules, the role of political parties and committees, and congressional interaction with political external actors.

P.S. 7—American Political Behavior
This course surveys the literature on American public opinion and political behavior. Topics include attitude formation and change, political knowledge, political identity, and mobilization.

P.S. 7—Interest Groups
This seminar investigates how interest groups attempt to influence American public policy. We will begin by exploring how interest groups form (or fail to form) and how they maintain themselves over time. We will then examine the multiple ways that interest groups attempt to influence both elections and the making of public policy. Throughout the course we will examine questions concerning how interest groups affect the functioning of democracy.

P.S. 7—Parties and Elections
Elections are the crucial institutional mechanism by which democratic control is exercised. As such, the function of elections as a democratic control turns on the answers to several questions. Who votes? What considerations determine how we should and how, in fact, we do vote? Do political parties provide us with meaningful choices? What impact do the media and money have upon the electoral process? Have the host of reforms of the nominating process during the last fifteen years enhanced or detracted from the democratic character of the electoral process? What, if any, policy
significance do elections have?

4.2.3 Courses in International Relations
These courses are designed to guarantee a common body of knowledge with respect to the field of international relations. The field consists of:

P.S. 560 International Relations Theory
This course provides a bridge between the conventional study of international relations and the analysis of externally directed public policy. It introduces the graduate student to specific policy areas such as international trade, aid, resources, and security policy.

P.S. 665 Comparative Foreign Policy Analysis
This seminar examines theories of foreign policy conflict, cooperation, and change in cross-national and historical perspective. Topics include systemic explanations, rational choice, dependence, democratic peace, and the role of leader perceptions and domestic politics

P.S. 666 National Security Policy
This course examines national security policy from both domestic and international perspectives. It examines a number of topics in the areas of defense appropriations, arms races, and strategic decisionmaking.

P.S. 667 Foreign Policy Decision Making
This course provides extensive analysis of the literature on American foreign policy decision making from both the group process and individual behavior perspectives. Classical and contemporary works in the field of foreign policy decision making are examined.

4.2.4 Comparative Politics
These courses are designed to guarantee a common body of knowledge with respect to the field of comparative politics. The field consists of:

P.S. 555 Comparative Public Policy
This course examines public policy processes and outputs from a cross-national perspective, with particular emphasis on developed countries.

P.S. 550 Comparative Politics
This course presents an introduction to comparative politics through a survey of the main concepts, theoretical debates and methodological approaches of the field. Themes that will guide this course include, but are not limited to: the origins and construction of the state, political development and democracy, nationalism and ethnic identity, institutions and electoral politics and the logic of collective action and political violence.

POLs 559 Contentious Politics

4.2.5 Courses in Political Research Methods and Theory
The Department of Political Science requires all students to develop competence in those research
methods commonly employed in policy research and political science. The core research methods courses are:

**P.S. 600 Introduction to Political Research**
This course is an introduction to the research methods and techniques used in political science and public policy analysis. Topics include epistemology, research designs, measurement, and survey and unobtrusive research.

**P.S. 601 Quantitative Political Analysis**
This course provides training in the application of statistical analysis techniques to political and policy research. Topics include hypothesis testing, probability, measures of association, and an introduction to regression analysis.

**P.S. 602 Advanced Quantitative Methods**
This course provides an in-depth treatment of multiple regression analysis as the basis for much of political and policy analysis. Topics covered include basic least squares methods, selected applications in econometrics, an introduction to time series analysis, and causal modeling.

**P.S. 603 Selected Topics in Research Methods**
Doctoral students must take an advanced course in research methods that may include such topics as limited dependent variables, advanced time series analysis, LISREL, categorical models, simulation, and other selected topics.

**P.S. 670 Political Theory**
This course is designed as an introduction to the basic questions that motivate research in the discipline of Political Science. The course's primary aim is to enable students to be theoretically aware and sophisticated in their use of concepts and theories for political inquiry. As such this is a broad introduction to the field of political theory, especially as it bears on and informs empirical work in the discipline.

### 4.2.5 POLS 797: Research

This course requires students to complete research toward the completion of their dissertation. All students must take at least 24 hours of POLS 797 as part of the PhD degree requirement.

Students taking POLS 797, “Research,” must consult with their advisors prior to the semester during which they enroll in 797. In consulting, students and their advisors will develop a “plan for 797 hours.” These plans will provide information—at a level of detail deemed suitable to advisors—regarding what work students will complete during the semester. The volume of work should be a function of the number of hours for which students enroll; more work will be required for students taking 9 credit hours of POLS 797 than students taking 6 credit hours, for example. In determining how much work to provide for in the “Plan for 797 Hours,” advisors may refer to the description of what 1 credit hour means to the University below. Because POLS 797 provides for students to receive academic credits while conducting research on their dissertations, the plan that students and their advisors develop should ensure that students make demonstrable progress on their dissertations. Students taking POLS 797 must provide their advisors with a plan describing the work that they will
do to meet the credit hours requirement. Advisors will assess whether this plan is sufficient and will revise it accordingly with the student. Advisors then may submit this plan to the Director of Graduate Studies at the beginning of the academic semester during which students take POLS 797 hours. Advisors will notify the Director of Graduate Studies as to whether students made “satisfactory” or “unsatisfactory” progress on their plan at the end of each semester. These reports from advisors will allow the Director of Graduate Studies to enter grades for students enrolled in POLS 797.

4.3 MA Degree Requirements
The MA degree requires 36 hours of graduate level work, with no more than 12 hours coming from advanced undergraduate topics, subject to approval by the Graduate Director. MA students choose an area of concentration of four courses from among the American, Comparative, International Relations, and Public Policy core fields. In addition, they complete a three-course methods sequence and 5 elective courses, in consultation with the Director of Graduate Studies, to complete the MA.

All full-time MA students must register for P.S. 799 Colloquium each semester in residence.

4.4 Ph.D. Degree Requirements
The PhD consists of two fields chosen from American Politics, International Relations, Comparative Politics, and Public Policy. Students choose two major fields in which they take comprehensive field examinations (see 4.6). In each of these fields, students must take five courses. In addition, students must take two electives and four methods courses (POLS 600, 601, 602, and 603).

Candidacy Requirements
All students entering the Ph.D. program are reviewed each year to determine eligibility for continuation as a candidate for the Ph.D.

4.6 Ph.D. Comprehensive Examinations
Comprehensive written examinations are administered at the completion of the candidate's formal course work in 2 major fields constituting the Ph.D.

Objectives  The comprehensive examination is a measure of the doctoral candidate's knowledge of political science and policy analysis. It evaluates the knowledge of the candidate from courses and seminars, directed readings, audited courses, and general reading and independent inquiry. The candidate should anticipate that questions will range beyond topics covered in courses. The comprehensive examination therefore is an evaluation of the candidate's understanding of the nature of political science and policy research, the theoretical issues of political science and the policy sciences, the nature of empirical inquiry, the scope and limitations of existing research on politics, government, and public policy, and either the professional practice of policy analysis or the teaching of political science. From the beginning of doctoral study candidates should seek out graduate faculty in the fields of their comprehensive examination for study suggestions and advice on preparatory reading, and they should consider enrolling in or auditing advanced undergraduate courses related to their examination fields.

Scheduling Procedures
1. Comprehensive written examinations are administered 2 times a year (January, and August). A candidate can sit for an exam after the completion of (a.) the candidate's formal course work in a field as specified on the candidate's plan of study and (b.) the elimination of all incomplete grades in courses that are required to complete that particular area. Exams will typically be administered during the week before to the first week of classes (for January: the week before the first week of the Spring semester; for August: the week before the first week of the Fall semester).

2. At least three months prior to the examination the candidate will consult with their advisor and the graduate director regarding the composition of the three person examination committee to be chosen from the faculty in the field of study (American, Comparative, International Relations, or Public Policy), one of whom will be designated as chair. According to University policy, only regular members of the graduate faculty can serve as committee chairs. Committee members must include members of the faculty with expertise in the examination field, with the regular members of the graduate faculty the ultimate arbiter regarding the composition of an examination committee.

3. Exams are written over an eight hour period. Candidates are allowed to use notes and references in answering the question on the exam.

Suggestions for Exam Preparation

1. Candidates should seek out graduate faculty in the fields of their examination for study suggestions and advice on preparatory readings.
2. Candidates should review all course material and assigned readings, and should consider preparing detailed reading notes, annotated bibliographies, or outlines.
3. Candidates should complete departmental reading lists when available and should consider preparing detailed reading notes, annotated bibliographies, or outlines.
4. Candidates are expected to have reviewed current research published in academic journals related to the fields of their examination. Candidates should consider reviewing several years’ worth of journal volumes and develop detailed reading notes and outlines of selected fields or topics of inquiry. Candidates may want to consider reviewing the works of significant scholars in the fields of their examination.
5. Candidates may consider enrolling in advanced undergraduate courses related to their examination fields, or completing readings from those courses.
6. Candidates should, at their own initiative, investigate other preparatory readings such as recently published books, class published works in the field, or government reports and popular writing on policy areas.

A Note on Faculty Expectations

In line with the expectations detailed above, candidates should note that comprehensive exams are designed to test your knowledge of your fields in a broad manner and thus are not restricted to covering course material. The faculty expects you to know the broad contours of the fields and to
develop answers that reflect both course material and material read outside of seminars. Moreover, you should anticipate using the entire time allotted to develop and write your answers. While some time should be spent developing ideas, lists of authors to be covered, and outlines for answers, the faculty expects you to spend the vast majority of the time writing. As a result, candidates are strongly encouraged to develop well-organized reading notes, annotated bibliographies, references guides, and outlines.

Testing and Evaluation Procedures

1. Candidates are given an 8 hour period to complete the exam. Exams are picked up at 9am (normally a Thursday) and returned 5pm on the day of the exam.
2. Committee members will serve as examination readers. They will grade and return their written evaluation of their portion of a candidate's examination to the graduate chair within fourteen calendar days after the completion of the examination. After considering the examination readers' evaluation and grades of high pass, pass, low pass, or fail on each question, the candidate's committee will assign a grade of high pass, pass, low pass, or fail for each field or subfield of the examination.
3. Candidates who fail an examination can be required by their committee to complete a plan of study before taking a second examination on the field. If a candidate fails a written field a second time, their participation in the Ph.D. program will be terminated subject to written appeal to the entire graduate faculty.
4. Written examinations and written evaluations of the examination become a permanent part of the candidate's departmental file.
5. If a student wishes to appeal a decision to remove them from the program based on failure of comprehensive exams, the student must appeal to the graduate admissions committee. The student may submit materials on his or her behalf, including a letter of support from his/her advisor. The graduate admissions committee will determine whether the appeal is granted.

M.A. Candidacy

Normally doctoral candidates who pass a Ph.D. comprehensive and have not been awarded the M.A. degree in Political Science from West Virginia University will be nominated for this degree upon the completion of their first examination and fulfillment of MA course requirements.

4.7 Ph.D. Dissertation and Prospectus

All doctoral students must complete a dissertation designed in accordance with the candidate's career objectives. The initial dissertation topic and research design must be approved by the faculty committee, chaired by the candidate's dissertation advisor. Members of the committee will be selected in consultation with the candidate and the Director of Graduate Studies. Although work on the dissertation does not begin formally until after the successful completion of comprehensive examinations, it is desirable for doctoral students to begin early planning for the dissertation. Early planning and consultation, both as to topic and research design, and committee membership, enhances the probability of completion without major problems.
The prospectus must be completed and formally defended before a dissertation committee within **nine months** following the successful completion of the **final** comprehensive exam. When a student does not defend his/her prospectus within nine months after passing his/her comprehensive exams, s/he is “off normal progress.” At this point, the student will have another **six** months to defend his/her prospectus. If students still have not defended a prospectus 1 year and 3 months after passage of their second comprehensive field exam, students must write a memo to the Graduate Admissions committee if they wish to remain in the program. In this memo, they must explain why they have not yet completed a prospectus, what measures they plan to pursue to complete one, and lay out a time frame for completion. The admissions committee will then decide if students remains in the program.

The prospectus is a research design that acts as an informal contract between the student and the dissertation committee to clarify the dissertation's nature and scope. It should contain at least the following eight parts:

- A **cover page**
- A 100 to 200 word **abstract** summarizing the dissertation's topic, methodologies employed and expected contribution to the literature
- A proposed **table of contents** for the dissertation
- A brief **introduction** stating in clear, precise and concise language, the dissertation's objectives, research hypotheses, and methodology
- A **literature review** that (1) demonstrates command of the existing literature and (2) indicates how the dissertation will enhance the existing literature
- A discussion of the **theoretical argument** that demonstrates how the dissertation will meet the University's requirement that all dissertations must "embody a definite contribution to knowledge"
- An explanation of the **methodologies** used, including the operationalization of all variables and justification for the use of any selected models and tests of statistical significance
- A brief **conclusion** indicating the expected results and their significance, and
- A comprehensive **bibliography**.

The prospectus should be between 20 to 25 pages in length. When composing your prospectus, you should follow the guidelines in the document, “Writing a Dissertation Prospectus,”

[http://polisci.wvu.edu/r/download/155808](http://polisci.wvu.edu/r/download/155808)

A final oral defense of the dissertation occurs after submission of a penultimate copy of the dissertation. The final, approved copy must be submitted in accordance with all university requirements.

### 4.8 Graduate Colloquium

An essential professional activity within the department is the Graduate Faculty Colloquium. The colloquium consists of an on-going series of speakers, seminars, research presentations, and workshops designed to encourage professional development and the lively exchange of ideas among graduate students and faculty. The intent of the colloquium requirement is to provide the opportunity
to socialize all graduate students into the profession of political science and to promote a sense of collegiality among graduate students and between graduate students and faculty. Colloquium credit will be three hours per semester. All full-time graduate students must register and attend a minimum of three department colloquia per semester. Part-time students should make an effort to attend as many colloquia as possible.

All Ph.D. students must present a colloquium sometime before graduation. Advisors will work with doctoral candidates to schedule an appropriate time for completion of this requirement. The presentation can be used for practice job interviews, practice conference presentations, or simply discussion of completed work or research in progress. Any student giving a colloquium during any semester will be excused from mandatory attendance at other colloquia during that semester.

Since the colloquium is a required activity, all full-time students must enroll in P.S. 799 Colloquium each semester in residence. Grading is on an Satisfactory ("S"), Unsatisfactory ("U") basis, as determined by attendance and/or other requirements.

5. GRADUATE ASSISTANT RESPONSIBILITIES

5.1 GA Work Assignment and Hours
Students receiving graduate assistantships are obligated to be available for assignment for the entire academic year (normally mid-August through mid May) in which the assistantship is received. Although the teaching and/or research assignment may vary from one assistantship to another, the total hours per week for which an assistant is obligated is 20. Specific teaching and research assistantship assignments are made by the Director of Graduate Studies at the beginning of each semester. Each assignment is based on two principal factors: (1) the overall professional development of the student; and (2) the needs of the department and faculty. Insofar as possible, graduate assistants will be rotated in assignment in order to maximize the students' professional experience. Typical assignments include independent teaching, leading recitation sections of large lectures, proctoring, grading, research assistance, computer laboratory assistance, computer data entry and analysis, literature searches, and selected administrative duties.

All department GA/TAs are required to sign up for proctoring and evaluation assignments. A list of courses requiring proctors is normally posted in the 2nd week of the semester.

Since graduate assistants are employees of the University, they are expected to adhere to all the rules of the university, including those dealing with sexual harassment, building and office security (including keys), university property, and the confidentiality of student records. All GTAs are required to attend the University's orientation for GTAs prior to the start of classes in the Fall term.

5.2 Research Assistantships
Graduate assistants assigned research functions in which they are to assist one or more faculty members are expected to report to their faculty supervisor(s) at the earliest possible time during the first week of the semester for instruction on their specific responsibilities. It should not be the case that the faculty member(s) have to track down the assistant. Likewise, it is not the responsibility of the faculty member(s) to have to initiate contacts with the RA throughout the semester; this is a responsibility of the graduate assistant. Projects and assignments given to RAs are to be performed on a timely basis and any assignment involving proctoring of classes or other activities requiring service
on a specific date should be adhered to strictly.

5.3 Teaching Assistants
Graduate students assigned as teaching assistants to large lecture classes should make arrangements to meet with the instructor of the course prior to the beginning of the semester. TAs will lead between 3 and 4 recitation sections, which meet once a week for 50 minutes. Responsibilities vary by assignment and course, but usually include covering that week’s readings and lecture, answering student questions regarding both, preparation for examination, and administration of quizzes. TAs also proctor and grade examinations, and are expected to attend lecture. TAs should make themselves available to students through formal office hours at least three hours per week. A schedule of office hours should be available to the department secretaries. It is desirable for students to serve as a TA prior to assuming independent teaching responsibilities.

5.4 Independent Teaching Responsibilities
Advanced graduate students may be assigned independent teaching responsibilities. In this instance, graduate teaching assistants are given the responsibility for planning and implementing one or more courses in consultation with appropriate faculty mentors. Typically, graduate assistants are assigned to teach introductory courses in their field of specialty. Those courses most often assigned to one or more graduate assistants in any given semester are:

- P.S. 102 Introduction to American Government
- P.S. 103 Global Political Issues
- P.S. 210 Introduction to Law and the Legal System
- P.S. 220 State and Local Government
- P.S. 230 Introduction to Policy Analysis
- P.S. 240 Introduction to Public Administration
- P.S. 250 Introduction to Comparative Politics
- P.S. 260 Introduction to International Relations

Students assigned independent teaching responsibilities are expected to work closely with the Director of Undergraduate Studies and the specific faculty member(s) associated with the particular course to which student is assigned. The Director of Undergraduate Studies and/or faculty member will review the course syllabus and other teaching materials, serve as a resource person, and review the course teaching evaluations.

Every teaching assistant who is independently responsible for a course will have an office area to meet with students. Instructors should make themselves available to students through formal office hours at least three hours per week. A schedule of office hours should be available to the department secretaries. In addition, any tests that require reproduction should be given to the secretaries in sufficient time to assure their readiness on the date required. This may be a matter of several days if the test is lengthy, such as is often the case with a multiple-choice type examination. Finally, if problems of discipline, academic honesty, or inter-personal problems arise, they should be brought to the attention of the Chair of the department at the earliest possible moment.

Independent teaching is an important step in enhancing the marketability of a student who wishes to obtain an academic placement. Successful performance, as indicated by course evaluations are a valuable addenda to the students placement credentials. In addition, teaching is a rewarding
experience in and of itself.

5.5 Teaching Practicum
Prior to assignment as an independent teaching assistant, students should register for P.S. 790 Teaching Practicum. The student will work with his or her advisor and the graduate director to select an undergraduate course for the purpose of providing training in classroom instruction. The student will be responsible for assisting the professor in all phases of the course, including the presentation of one or more lectures, and will attend class to provide a basis for the student’s own entry into the classroom. The instructor will convey to the graduate director the appropriate grade for the course (S or U). In addition, the student is encouraged to attend classes taught by other faculty in the department. The student should produce a “syllabus” for the semester which parallels the course that is being used as well as identifies other classes in which the student has observed. The student will coordinate this with all participating faculty.

5.6 Teaching Evaluations
Graduate teaching assistants who have responsibility for their own courses are required to have their courses evaluated each semester. Teaching evaluations are administered by the department using the official university form during the final week of instruction. The evaluation takes about 20 minutes to administer. Teaching evaluations are returned to the instructor in about six weeks. These evaluations serve as a basis of the Department evaluation of student teaching. Graduate instruction is evaluated as excellent, good, satisfactory, and unsatisfactory. In evaluating student instruction emphasis is placed on a combination of factors, including course syllabus, GPA, student evaluations and feedback.

5.7 Annual Evaluation of Graduate Assistants
In addition to the annual evaluation of all graduate students in regard to academic progress, the department also conducts an evaluation of performance in regard to assistantships. The criteria for this evaluation are work performance, diligence, punctuality, initiative, and general responsibility. These criteria, together with academic performance, constitute the basis for continuation of assistantships.

5.8 Sexual Harassment Policy
The department stresses the need to guard against sexual harassment in the workplace, and requires that all GTA/RAs acquaint themselves with college and university guidelines. A copy of the WVU sexual harassment policy will be provided to all students, and its policies must be strictly adhered to.

6. University Graduation Requirements

6.1 University Policy on Enrollment in Final Semester
All graduate students must enroll for at least 1 credit hour during the semester (or summer) of graduation. Graduate students that are on campus will be required to do the registration by the normal deadlines. Graduate students that have left the campus will be allowed to register until the 10th week of classes in fall or spring semesters and the 3rd week of Summer II. Tuition waivers are not used to meet this enrollment requirement.

6.2 Dissertation Defense and Submission of Approved Copy
Doctoral candidates must submit a dissertation pursued under the direction of a single political science graduate faculty member in consultation with at least four other graduate faculty, one of whom must be from outside of the department. Members of the dissertation committee are selected in consultation with the Director of Graduate Studies and the faculty advisor.

After the candidate's dissertation has been determined to be at a draft stage meriting an oral defense, the oral examination is scheduled. The student's committee chairperson must indicate in advance the time, place, and examining committee members and receive clearance from the Graduate Office of the Eberly College of Arts and Sciences before the examination can be given. Such notification of doctoral examinations must be received at least three weeks before the examination date.

After acceptance by the examining committee, the dissertation must be signed by no less than four of the five committee members. Final preparation of the dissertation is specified in Regulations Governing the Preparation of Dissertation and Theses, reproduced below. The student is required to provide the Department and his or her advisor with a final bound copy.

6.3 Summary of Doctoral Requirements (University)
1. Shortly after admission to the program (usually within the first semester of course work), an advisory committee is formed and produces the student's plan of study.
2. Student completes requisite course work and other program requirements, satisfying also the stipulated residency requirement.
3. Student takes written and/or oral comprehensive (qualifying) examination for admission to candidacy. The results are communicated to the appropriate office by the student's graduate program adviser.
4. Student undertakes a doctoral dissertation under the guidance of a dissertation committee. The dissertation phase begins with approval of a dissertation prospectus by the dissertation committee, the department chairperson, and the school or college dean.
5. A copy of the preliminary draft of the dissertation is given to each committee member at least one month prior to the final oral examination.
6. The dissertation adviser (committee chairperson) requests a clearance for the final examination from the school or college dean's office no later than three weeks before the scheduled date. Student pays fee and completes graduation forms.
7. The time and place of the examination is announced.
8. The student defends the dissertation in an oral defense.

6.4 Summary of Masters Requirements (University)
1. Shortly after admission to the program (usually within the first 9-12 semester hours of course work), an advisory committee is formed and produces the student's plan of study.
2. Student completes requisite course work and other program requirements.
3. Student completes an Application for Graduation and Diploma. This should be done no later than two weeks after registration of the final semester.

6.5 Time Limits
Doctoral students are allowed up to five years after passage of comprehensive examinations to complete the degree. If more than five years has transpired, the student must re-take the comprehensive examinations and meet whatever other requirements the department deems appropriate to remain current in the discipline and to qualify for the degree.
Masters students have a total of eight years to complete their degrees. Both M.A. and Ph.D. students must have any coursework extending beyond the eight year limit recertified if they are to use such courses as counting toward degree requirements.

6.6 Graduation Ceremony
Masters and Ph.D. degree recipients are urged to attend University and department-sponsored graduation ceremonies in celebration of the achievements which these degrees represent. The University holds ceremonies in May and December; the department only in May. Students who intend to graduate in the summer, in December, or in May, should attend the department's May ceremony, at which time all graduates are honored. Graduates and their families will receive notice of the department's graduation ceremony and accompanying activities.

7. PLACEMENT

7.1 The Job Market
Students in the Public Policy Program typically target two main avenues of employment. The first, for Ph.D. students, is the academic job market in the nation's colleges and universities, both in the U.S. and abroad. The Ph.D. is a requisite for these positions, as is the necessity for demonstrating outstanding research skills. Ph.D. graduates of this department have become increasingly competitive nationwide in the search for positions in higher education. Their success is testimony to the rigor of the doctoral program and the reputation the program has achieved in recent years. The M.A. program is linked to the academic job market in that students in the M.A. program use this degree as the first step in leading toward the Ph.D. Many successful masters degree holders in the Public Policy Program ultimately continue on to complete their Ph.D. at West Virginia University. The transition from M.A. or MPA to Ph.D. can be accomplished with ease and is a natural choice for many students. Other masters students decide to continue their work toward the Ph.D. at other universities, and the graduates of this M.A. program do very well at other universities, largely because of the quality and rigor of the WVU program.

The second targeted area of employment is government and the private sector. Both M.A. and Ph.D. students, but particularly masters degree holders, most often seek positions as policy analysts in government or with private organizations. There are many positions in government, at all levels, and in both executive and legislative branches, that are available to well-trained policy analysts. These include government agencies such as the U.S. General Accounting Office, the U.S. Department of Education, the U.S. Department of Health and Human Services, the U.S. Department of Commerce, and so forth. State agencies such as the Commission on Aging and international organizations, such as the International Monetary Fund, also provide positions for policy analysts. Likewise, Congressional and state legislative committee and research organizations hire persons especially trained in policy analysis. In all, there are some 15 million jobs in government, many appropriate for persons with advanced degrees in policy analysis.

In the same way that government provides opportunities for the policy analyst, so too does the private sector, particularly special interest groups. There are, today, some 150,000 organized interests in the U.S., many of them with programs that focus on governmental affairs. These organized groups frequently hire policy analysts to assist them in making their case before Congress, state legislatures, and executive agencies. Strong lobbying and public affairs divisions are present in almost every major interest group, including those representing the environment, health, energy, labor, business, education, agriculture, social welfare, and the like. Both the M.A. and Ph.D. programs at WVU target
7.2 Internships
The Department of Political Science has available a graduate student internship with the Legislative Services Division of the West Virginia Legislature. This internship provides the opportunity for M.A. students to practice their policy analyst skills. The internship runs from January 1 to April 15 each year. Interns are paid $1,000 a month and receive six hours of graduate credit. Students who take advantage of this opportunity will have their normal academic program interrupted the semester they work in Charleston, but they gain valuable experience for the future job market. Applications for the internship are available from the department and should be completed by November 1. The application should be filled-out in consultation with the Chairperson of the department.

7.3 Building the Placement Vita
Students are urged to begin early to build a job placement vita or resume that will highlight their skills and experience. Contained in the vita should be specific skills gained from courses, such as statistics, knowledge of policy evaluation techniques, understanding of the policy process as it relates to applied policy analysis, and training in economics and other associated fields. The vita should also highlight work experience as a policy analyst, research reports for which you are the author, co-author, or member of a project team, publications in professional or applied journals, paper presentations, and other reports, papers, and activities demonstrating research competence.

7.4 Compiling Placement Credentials
The department will assist students in compiling their credentials and mailing them to potential employers. These credentials should be flawlessly prepared and carry with them the endorsement of the department as revealed in a cover letter and supporting documents. The credentials packet should include:

1. Cover Letter from Department Chairperson
2. Letter from Candidate Expressing Interest
3. Vita
4. Letters of Reference
5. Transcript
6. Writing Sample (as requested)
7. Teaching Evaluations (as requested)
8. Other

The American Political Science Association maintains a placement service. Doctoral students completing their degrees should investigate the service and plan to attend one or more associations meetings (e.g., APSA, MWPSA) to meet with representatives of colleges and universities advertising positions. In addition, the APSA publishes monthly the APSA Personnel Newsletter which lists academic positions. The newsletter may be checked-out in the department main office (316 Woodburn).
### 7.5 Online Employment Resources for Political Scientists

An extensive list of online resources, including the links listed here, is available at the Association’s website: [www.apsanet.org/jobplc/onlinejobs.cfm](http://www.apsanet.org/jobplc/onlinejobs.cfm)
